

TOYOTA MOTOR MANUFACTURING (UK) LTD
ENVIRONMENTAL POLICY

TOYOTA EARTH CHARTER

The basic philosophy of the Toyota Earth Charter incorporates:

1. **Contribution to a prosperous 21st Century Society**
In order to contribute to a prosperous 21st Century society, aim for growth that is in harmony with the environment, and strive to achieve zero emissions throughout all areas of the business.
2. **Pursuit of Environmental Technologies**
Pursue all possible environmental technologies, developing and establishing new technologies to enable environment and economy to coexist in harmony.
3. **Voluntary Actions**
Develop a voluntary improvement plan, not only based on thorough preventative measures and compliance to laws, but one that also addresses environmental issues on the global, national and regional scales and promotes continuous implementation.
4. **Working in Co-operation with Society**
Build close and co-operative relationships with a wide spectrum of individuals and organisations involved in environmental preservation including governments and local authorities, as well as with related companies and industries.

TOYOTA MOTOR MANUFACTURING (UK) Ltd.
PRINCIPLES

1. Toyota UK will, at a minimum, meet all regulatory and legislative requirements.
2. Toyota UK is committed to the continual improvement in environmental performance and prevention of pollution. This will be achieved by:
 - a) Aiming to minimise the environmental effects of new materials and processes, through prior assessment of the environmental impact.
 - b) Seeking ways to minimise the consumption of resources, to eliminate or reduce the production of releases to the environment and to minimise the quantity of waste requiring disposal.
3. Toyota UK will engage in the continual development and strengthening of the understanding of all Toyota UK members on the best environmental operating and management practices.
4. It is the aim to cultivate community awareness of Toyota UK's commitment to the environment and to continue to support and participate in environmental activities ancillary to automobile manufacturing.

RESPONSIBILITIES

1. The Toyota UK Management is responsible for establishing and reviewing the environmental targets and objectives for the continued improvement in environmental performance.
2. To assist in safeguarding the environment is the responsibility of every Toyota UK member or contractor to be diligent in the control and operation of processes and in the handling and disposal of materials.
3. It is the responsibility of Environmental Affairs to provide guidance to all departments, to co-ordinate the implementation of appropriate management and operational procedures to ensure compliance with regulatory and legislative requirements.
